COMPANY PROFILE

关于我们

Shandong Chisboom group (Chisboom Company), is a high-tech enterprise that integrates science, industry, and trade. It has been focusing on the research, production, and sales of aerosol products, with more than 10 aerosol canning production lines. Its products cover the fields of home daily chemical, automotive beauty, and industrial coating anti-corrosion. The product sales are not only spread to various provinces, cities, and autonomous regions in China, but also exported to Europe, America, Southeast Asia, and other countries. Africa and other regions are steadily increasing their market share! With development, Chisboom Company has established branches and warehouses in South Africa to provide more convenient and efficient supply services for users in the African market.

OUR FACTORY

工厂简介

Chisboom has two production factories in China, with the southern factory located in Guangzhou, Guangdong Province and the northern factory in Linyi, Shandong Province. We provide OEM and spot products to customers, specializing in the manufacturing of various functional aerosols and personalized customization needs, including color, function, capacity, parameters, etc

BUSINESS OVERVIEW

业务概述

S

P

R

A

Y

► ADD SOME COLOR TO LIFE

Our factory not only supplies aerosol finished products to global customers, but also provides production technology and accessories such as valves, cans, lids, etc

A collection of aerosol products, including two spray cans (one white, one blue) and several white plastic caps, arranged on a textured blue surface.

A vibrant graffiti artwork featuring a stylized face with blue skin and large, expressive eyes. The face is wearing a red and green striped hat. Above the face, the text "x Siere Knight x" is written in a stylized font. Below the face, the word "Oz" is written in large, bold, yellow letters with a black outline. The background is a mix of red, blue, and green colors.

Aerosol Spray Paints

Colored Aerosol Paint

Customized Color Aerosol Paint

Shake well before use

Product Features

This product belongs to daytime fluorescent aerosol paint, which is different from luminous paint and reflective paint. It reflects most of the fluorescent light under sunlight, resulting in a more vibrant color than ordinary colors. It has the characteristics of easy use, flexibility, good atomization, and high spray rate. The hardness, adhesion, and impact resistance of the paint film are excellent. It has excellent decorative and protective functions for various substrates such as metal, surface treated glass wood, and ABS plastic stools. Suitable for industries such as advertising production, decoration, and instrument manufacturing.

Main components

Organic resins, pigments, organic solvents, and projectiles

Shake well before use

Product Features

This product belongs to quick drying acrylic aerosol paint, using internationally advanced technology Lacquer making technology and refined raw materials. Easy to construct Excellent atomization, full paint film, good weather resistance, high hardness Excellent flexibility, impact resistance, strong adhesion, bright color Excellent performance such as long-lasting stability. Widely used in metals Wood, glass, leather products, ceramics, ABS plastics, etc Spray painting and repair of multiple material objects.

Main components

Organic resins, pigments, organic solvents, and projectiles

Metal Colored Spray Paint

Shake well before use

Product Features

This product belongs to daytime fluorescent aerosol paint, which is different from luminous paint and reflective paint. It reflects most of the fluorescent light under sunlight, resulting in a more vibrant color than ordinary colors. It has the characteristics of easy use, flexibility, good atomization, and high spray rate. The hardness, adhesion, and impact resistance of the paint film are excellent. It has excellent decorative and protective functions for various substrates such as metal, surface treated glass wood, and ABS plastic stools. Suitable for industries such as advertising production, decoration, and instrument manufacturing.

Main components

Organic resins, pigments, organic solvents, and projectiles

318 Chrome Plating Suitable For Stainless Steel Repair Paint

Shake well before use

Product Features

This product is refined using international advanced paint making technology and raw materials; It is a high-quality product rust steel chrome plating aerosol, metal paint film close to stainless steel color; It has the characteristics of flexible use, easy operation, good atomization, high spray rate, rapid film drying, and good metal mirror decoration effect. It can be coated with electroplated wood, glass, ABS plastic and other substrates with surface treatment.

Main components

Organic resin, metal powder, organic solvent, and propellant

318 Chrome Plating Suitable For Stainless Steel Repair Paint

Shake well before use

Product Features

This product is refined using international advanced paint making technology and raw materials, and is a high-quality imitation aluminum profile protective layer color aerosol, paint film close to various aluminum profile colors, with it is characterized by flexible construction, convenient operation, good atomization, high spray rate, rapid film forming and drying, and good decoration effect, which can be comparable to the aluminum profile finish, and can resist ultraviolet radiation and enhance the aging resistance of the quilt. It can also be used for painting on metals, surface treated wood, glass, ABS plastics, and other materials.

Main components

Organic resin, metal powder, organic solvent, and propellant

Suitable For Aluminum Repair Paint

Shake well before use

Product Features

This product is carefully selected from international high-quality resins, metal pigments, and advanced additives to produce visual effects such as chrome plating, gold plating, or galvanizing. The operation is flexible, simple, with excellent atomization effect and extremely high spraying rate. Excellent decoration and protection for metal products, glass, sheet metal, ABS plastic, etc.

Main components

Organic resins, pigments, organic solvents, and projectiles

Electroplated Color Spray Paint

Shake well before use

Product Features

This product is carefully selected from international high-quality resins, metal pigments, and advanced additives to produce visual effects such as chrome plating, gold plating, or galvanizing. The operation is flexible, simple, with excellent atomization effect and extremely high spraying rate. Excellent decoration and protection for metal products, glass, sheet metal, ABS plastic, etc.

Main components

Organic resin, metal powder, organic solvent, and propellant

Fluorescent Paint

Shake well before use

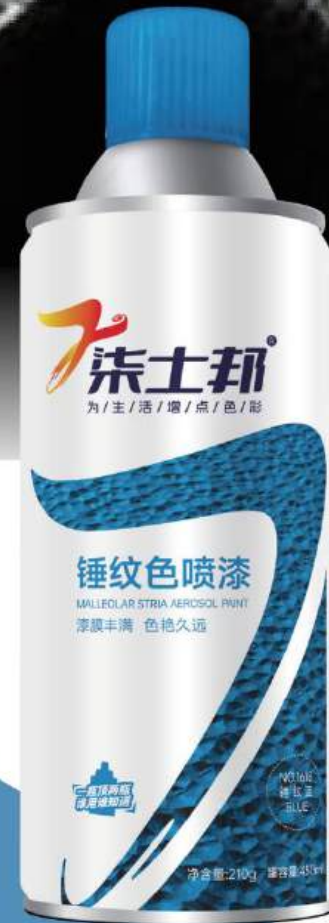

Product Features

This product belongs to daytime fluorescent aerosol paint, which is different from luminous paint and reflective paint. It reflects most of the fluorescent light under sunlight, resulting in a more vibrant color than ordinary colors. It has the characteristics of easy use, flexibility, good atomization, and high spray rate. The hardness, adhesion, and impact resistance of the paint film are excellent. It has excellent decorative and protective functions for various substrates such as metal, surface treated glass wood, and ABS plastic stools. Suitable for industries such as advertising production, decoration, and instrument manufacturing.

Main components

Organic resins, pigments, organic solvents, and projectiles

Hammer Pattern Paint

Shake well before use

Product Features

This product belongs to quick drying acrylic aerosol paint, using internationally advanced technology Lacquer making technology and refined raw materials. Easy to construct Excellent atomization, full paint film, good weather resistance, high hardness Excellent flexibility, impact resistance, strong adhesion, bright color Excellent performance such as long-lasting stability. Widely used in metals Wood, glass, leather products, ceramics, ABS plastics, etc Spray painting and repair of multiple material objects.

Main components

Organic resins, pigments, organic solvents, and projectiles

Circuit Board Protective Paint

Shake well before use

Product Features

Chisboom circuit board protective paint is a transparent acrylic based protective paint that can be used as a three proof paint for printed circuit boards, providing moisture, dust, and salt spray protection. At the same time, it also prevents leakage and short circuits to extend the service life of the equipment.

Blue White Zinc Aerosol Paint

Product Features

Chisboom Blue White Zinc belongs to the anti-corrosion coating of metal structural components. It is not only used for missed plating and color repair on galvanized surfaces, but also for anti-corrosion coating on metal surfaces with low anti-corrosion requirements. Chisboom Blue White Zinc has the same high gloss new color coating color as galvanized parts. Chisboom blue white zinc, like galvanized parts, will change with the color of the galvanized parts over time. As a repair for galvanized parts, the repair part used on galvanized parts will not be obvious. Chisboom Blue White Zinc is a hand sprayed product with simple operation and is not limited by space and space. It can achieve galvanizing effect with a gentle spray. If you need your metal structural components to have both a bright blue and silver color, as well as a 1-3 year anti-corrosion effect, Chisboom Blue and White Zinc will definitely meet your needs.

Galvanized Repair Paint

Product Features

Chisboom Blue White Zinc belongs to the anti-corrosion coating of metal structural components. It is not only used for missed plating and color repair on galvanized surfaces, but also for anti-corrosion coating on metal surfaces with low anti-corrosion requirements. Chisboom Blue White Zinc has the same high gloss new color coating color as galvanized parts. Chisboom blue white zinc, like galvanized parts, will change with the color of the galvanized parts over time. As a repair for galvanized parts, the repair part used on galvanized parts will not be obvious. Chisboom Blue White Zinc is a hand sprayed product with simple operation and is not limited by space and space. It can achieve galvanizing effect with a gentle spray. If you need your metal structural components to have both a bright blue and silver color, as well as a 1-3 year anti-corrosion effect, Chisboom Blue and White Zinc will definitely meet your needs.

Galvanizing Coloring Agent

Product Features

Qi Shi Bang galvanizing coloring agent is mainly used for coloring and repairing areas with color differences and missed plating on the surface of galvanized parts. He and the color of the galvanized parts change color simultaneously, ensuring the beauty of the product through equal fading. The coating color has a silver color with the same high glossiness as galvanized parts. At the same time, like galvanized parts, with the passage of exposure time, fading will occur, so as not to make the repaired parts on the galvanized parts very noticeable. This product is widely used for galvanizing coloring or repairing galvanized parts.

Galvanized Anti Rust Spray

Product Features

Chisboom galvanized anti rust spray can be widely used for the anti-corrosion and anti rust of metal structural components, as well as the maintenance and repair of galvanized structural components (hot-dip galvanizing, electrogalvanizing, hot-spray zinc aluminum). It can be used for small-scale painting (repair of welding joints in galvanized components, repair of hot-dip galvanizing leakage, repair of damage to some galvanized parts, etc.), as well as for large-scale painting. It can be used alone or for surface spraying of Qishibang cold

Galvanized Anti-corrosion Spray

Product Features

Chisboom galvanized color tone anti-corrosion spray can be widely used in the anti-corrosion and rust prevention of metal structural components, as well as the maintenance and repair of galvanized structural components (hot-dip galvanizing, electrogalvanizing, hot-spray zinc aluminum). It can be used for small-scale painting (repair of welding joints in galvanized components, repair of hot-dip galvanizing leakage, repair of damage to some galvanized parts, etc.), as well as for large-scale painting. It can be used alone or for surface spraying of Qishibang cold galvanizing.

Anti-corrosion Spay With High Zinc

Product Features

Chisboom Silver Rich Zinc Anti corrosion Spray can be widely used in the anti-corrosion and rust prevention of metal structural components, as well as the maintenance and repair of galvanized components (hot-dip galvanizing, electrogalvanizing, hot-spray zinc aluminum). It can be used for small-scale painting (repair of welding joints in galvanized components, repair of hot-dip galvanizing leakage, repair of damage to some galvanized parts, etc.), as well as for large-scale painting. It can be used alone or for surface spraying of Chisboom cold galvanizing.

Cold Galvanized Heavy Anti-corrosion Agent

Product Features

Chisboom strong cold galvanizing heavy-duty anti-corrosion spray can be widely used in the anti-corrosion and rust prevention of metal structural components, as well as the maintenance and repair of galvanized parts (hot-dip galvanized, hot-dip galvanized, hot-dip galvanized aluminum). It can be used for small-scale painting (repair of welding joints in galvanized parts, repair of hot-dip galvanizing leakage, repair of damage to some galvanized parts, etc.), as well as for large-scale painting. It can be used alone or in combination with other coatings.

Wood Repair Paint

Shake well before use

Product Features

This product belongs to fast drying nitro aerosol paint, refined using international advanced paint making technology and raw materials. It has excellent properties such as easy construction, excellent atomization, full paint film, good weather resistance, high hardness, excellent flexibility, impact resistance, strong adhesion, bright color, and long-lasting stability. Widely used for spraying and repairing various materials such as metal, wood, glass, leather products, ceramics, ABS plastic, etc.

High Temperature Resistant Colored Spray Paint

Shake well before use

Product Features

This product belongs to daytime fluorescent aerosol paint, which is different from luminous paint and reflective paint. It reflects most of the fluorescent light under sunlight, resulting in a more vibrant color than ordinary colors. It has the characteristics of easy use, flexibility, good atomization, and high spray rate. The hardness, adhesion, and impact resistance of the paint film are excellent. It has excellent decorative and protective functions for various substrates such as metal, surface treated glass wood, and ABS plastic stools. Suitable for industries such as advertising production, decoration, and instrument manufacturing.

Main components

Organic resins, pigments, organic solvents, and projectiles

Shake well before use

flower color paint

Product Features

This product is lead-free water-based environmental protection formula. It is not dissolved pvc foam, it does not fade when exposed to waterwater, mild smell, no strong organic solvent pungent smell. It has good hardness, adhesion, gloss, flexibility, impact resistance and other comprehensive physical properties,rich and gorgeous color, excellent decorative effect, and has a good protection function. Widely used for all kinds of dried flowers, Preserved flowers, fresh flowers (such as: rose, chrysanthemum, sunflower, peony, plum, carnation, lotus).

Automotive

Multi Functional Anti Rust Lubricant

Product Features

This product is refined using advanced technology and integrates six functions, including rust loosening, lubrication, rust prevention, dehumidification, cleaning, and noise reduction. It is suitable for the maintenance and upkeep of equipment in aerospace, shipping, land transportation, military industry, factories, homes, and other fields. This product can quickly remove oil stains, dirt, and adhesives from the surface of objects, quickly loosen rusted parts, lubricate various machine parts, eliminate noise, efficiently remove moisture from metal and circuit surfaces, form a protective film on the surface of objects, prevent rust and chemical erosion, provide protection for various metal equipment in harsh environments, and improve work efficiency. This product does not contain carcinogens or suspected carcinogens, and is green, environmentally friendly, and safe.

Shake well before use

Rust Proof Cleaning Agent

Shake well before use

Product Features

This product is refined from high-quality international raw materials and can quickly remove gum, oil stains, dirt, and oxide deposits from carburetors, air dampers, electronic injection systems, and various mechanical parts. Restore optimal condition and efficiency, extend the service life of mechanical components. This product is a non-destructive oxygen sensor component.

Leather Wax

Shake well before use

Product Features

This product is an efficient and environmentally friendly multifunctional fast polishing agent:

1. Can quickly remove dust and dirt
2. Bringing a natural lemon aroma to the car interior
3. Can immediately restore the original natural colors on the surfaces of military vehicle dashboards, leather seats, synthetic leather products, and other objects
4. Form a long-lasting bright protective layer with anti-static function to slow down the aging of leather, plastic, and rubber products Aging and reducing dust accumulation.

Tar Asphalt Cleaner

Shake well before use

Product Features

This product is refined from high-quality international raw materials and can quickly penetrate, dissolve, and remove dirt such as asphalt, tar, and bird droppings on the surface of car and motorcycle body paint, as well as metal wheel frames. It has a polishing and dustproof effect and does not damage car paint. It is suitable for cleaning various "seamless" surfaces of metal, car paint, plastic, glass, and other surfaces.

Grease Spray

Shake well before use

Product Features

Chisboom high-temperature resistant butter spray not only has inherent anti-wear, noise reduction, lubrication, and rust prevention effects, but also has a high-temperature resistance performance of up to 200 ° C. When it is necessary to timely lubricate the hot metal components after high-speed operation and friction, there is no need to wait for the metal components to cool down. Simply spray butter spray on the friction surface of the hot metal components, which greatly saves construction time and improves work efficiency. This product is suitable for lubrication and rust prevention of transmission components such as bearings, gears, cams, guide rails, and chains used under high temperature conditions. It has excellent lubrication and load-bearing capacity, and is not prone to wear and tear. It effectively eliminates noise, prolongs the service life of workpieces, and reduces friction and wear. This product has strong adhesion on the surface of the workpiece, effectively isolating the contact between air, moisture, and metal workpieces for a long time protect the workpiece from moisture and rust.

Rust Turn Agent

Shake well before use

Product Features

Chisboom Rust Conversion Spray is a product that contains a weakly acidic polymer complex that can convert iron oxide (rust) from steel into organic iron compounds. Its excellent rust conversion function can be coated with rust. It has good cathodic protection effect, and its wear resistance, durability, adhesion, and impact resistance are equally excellent. It has excellent oil resistance, solvent resistance, and salt spray resistance. The coating dries quickly and the interlayer adhesion of the paint film is strong.

Hardware And Electromechanical Rust Prevention Cleaning Agent

Product Features

Chisboom Machine Hardware Electromechanical Anti rust Cleaning Agent is a brand new product, and the VOC content of the cleaning agent meets the fundamental GB standards 38508 Volatile Organic Compound Restriction Requirements, specifically developed for hardware and electromechanical applications, to remove oil stains and keep them in good condition. This product is widely used for workpiece cleaning in the hardware and electromechanical field, such as motors, cutting tools, fixtures, machine tool accessories, transmission components, compressors, seals, bearings, etc.

Precision Instrument Cleaner

Shake well before use

Building Materials

Paint Remover

Product Features

This product is mainly composed of international high-quality source materials such as special effect paint remover solvent and paraffin. It is a special grade paint remover, mainly used for oil-based paints, especially suitable for the removal of self drying alkyd paint, amino baking paint, nitro paint, acrylic paint, and some epoxy and low-temperature curing two-component paints. It has the advantages of convenient construction, high paint removal efficiency, and no corrosion to metal substrates.

Shake well before use

Wall Repair Paint

Waterproof Plugging Agent

Shake well before use

Product Features

This product is made of international high quality water-based acrylic emulsion, bowl white powder, filling pigment, environmental protection additives and deionized water. The construction is simple, fast and versatile, and can be widely used in residential, school, office building, hotel and other buildings interior wall, ceiling, gypsum board and wood interval decoration repair and renovation painting, especially suitable for small area spraying and repair

Shake well before use

Product Features

Self-spraying waterproof repair, can form a waterproof coating on the surface of the object, with convenient construction, portable fast drying, quick leak stop, waterproof and mois_x0002_ture-proof characteristics, suitable for pipe root, pipe mouth, corner, roof cracks, walls, steel shed and other base objects of waterproof repair, a spray easy to stop leakage, is a trusted assistantfor individuals and units waterproof repair.

PU FOAM

Brightening Agent Suitable For Stainless Steel

Shake well before use

Product Features

Single component polyurethane foam sealant material is particularly suitable for the application of insulation and installation in construction departments. It is suitable for bonding, fixing, installation, sound insulation, insulation, sealing, moisture-proof, gas isolation, filling structural gaps, engineering holes, and various crack gaps;

Main components

Organic resin, metal powder, organic solvent, and propellant

Product Features

This product is oil-based and is used for the maintenance of stainless steel surfaces to prevent oxidation and corrosion by various oxides, prevent rust spots, and maintain a smooth and new stainless steel surface after use. It also has a dust-proof lamp function to prevent finger marks. Very suitable for daily maintenance of elevator panels, handrails, etc. in public places. Keep stainless steel fresh and shiny all year round. Used for surface polishing and cleaning of various stainless steel products, such as elevators, factory equipment, stainless steel cabinets, ornaments, stainless steel exhibits, shower faucets, railings, handles, etc.

Main components

Surfactants, organic solvents, projectiles

Shake well before use

Home Care

Lemon Polish

Product Features

This product is specially designed for the professional care of various types of furniture and daily necessities. It can effectively clean the surface stains of furniture, delay surface aging, and make furniture shiny and new. Its natural lemon aroma makes people feel refreshing. It is widely used for the protection and maintenance of various wooden, leather, fire-resistant plywood, marble and other furniture surfaces.

Shake well before use

Strong Adhesive Remover

Shake well before use

Product Features

This product is made with a special formula and contains a unique penetrating agent that can quickly penetrate various stubborn adhesive layers. It has a fast adhesive removal speed, a fresh odor, simple operation, and a small dosage. Application scope; This product is widely used in the removal of surface residue on decorative wooden boards/aluminum-plastic panels/-metals/ceramics/glass/automotive paint/some rubber and coatings.

Sticker Remover For Stainless Steel & Aluminum

Shake well before use

Product Features

This product is a new generation of aerosol high-efficiency peeling paper remover, mainly used for quickly removing old paint and stainless steel protective film, ensuring the surface glossiness of objects without leaving any scars; Widely used for cleaning and maintenance of metal components on stainless steel door and window panels, machinery, and instruments. It has the advantages of convenient construction, high efficiency, and no corrosion to stainless steel.
